Excerpt: . very far from complete; and hence it is that Experiment, though valuable, nay, indispensable, is often very misleading. We shall see evidence of this in the course of our inquiry. But there is one direction in which Experiment may always be relied on--the direction of exclusion. An experiment may fail to tell us which is the organ of a particular function; but it will never fail to tell us which is not the organ of the particular function, if we see the function persisting after the organ has been removed; and to know what parts are not necessary, is to arrive, by exclusion, at those which are. Observation of the effects of disease, accident, or deformity has a similar value to that of Experiment; but extreme caution is necessary in interpreting these cases. Anatomy is, of course, indispensable; and comparative anatomy becomes a...
