Language: English Brand New Book ***** Print on Demand *****.Excerpt from Constructional Steelwork: Being Notes on the Practical Aspect and the Principles of Design: Together With an Account of the Present Methods and Tools of Manufacture There are in this country some thousands of civil and mechanical engineers, architects, and surveyors who find they have, in increasingly numerous cases, to design and superintend erections involving in some form or other the employment of mild steelwork. A few years ago this material was seldom used except by railway companies. Government departments and a few consulting engineers; but with its adaptation to building and to the ordinary requirements of the smaller engineering enterprises, it has become imperative that every designer should know something about it. So far as its mere mathematics go, any educated man may easily, in a short time, extract sufficient from any of the many excellent text-books now published to assure himself that his ideas are theoretically beyond reproach, and that he has got a sufficient quantity of metal in the right places to ensure stability. He is, however, badly handicapped by his lack of practical knowledge. He does not know, of himself, the best practical dispositions to make for economy, and all unconsciously he wastes valuable time and money every time he shapes his ideas on paper. This is not his fault, but is due to the lack of opportunity hitherto to correct any notions he may have formed, by reference to some plain account of the essentials and modes of manufacture. Text-books cannot within their limits do more than merely skirt this question, although in reality it is quite as serious and worthy of earnest study as is pure theory. The present work is...
