

## The Plant world An illustrated monthly journal of popular botany Volume 14

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 106 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 edition. Excerpt: . . . while in general the least upward extension is observed in the Apennines and in the Balkan Peninsula. -V. M. Spalding. The Peat Deposits of Florida. --Harper has published a report of his reconnaissance of the peat deposits and peat-forming areas of Florida. In addition to a considerable mass of information relative to peat, the report contains the best description of the vegetation of Florida which has yet been made. Fourteen natural divisions of the state are outlined by map and briefly characterised as respects their topography, soils and vegetation. The low elevation and immature topography of Florida give rise to a bewildering variety of palustrine areas, which have naturally received more attention in this paper than the upland vegetation. Harper has described some 27 types of marshes, swamps, bogs, prairies, bays and other formations with...

### Reviews

*Totally among the best publication I actually have actually gone through. It can be filled with wisdom and knowledge. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- *Glen Ernser*

*Very helpful to all class of folks. Better than never, though I am quite late in start reading this one. You can expect to like just how the blogger create this pdf.*
