Pages Number: 267 Publisher: Fourth Military Medical University. Pub. Date: 2010 - 01-01 1st edition 1st printing 2010-01-01 This textbook is divided into four parts. the first part of the structure and function of biological macromolecules. mainly for proteins. nucleic acids. enzymes of the composition. structure and function and physical and chemical characteristics. The second part is the material and energy metabolism. mainly for the carbohydrate metabolism. lipid metabolism. protein catabolism and nucleotide metabolism and other metabolic pathways. the physiological significance of metabolic pathways. metabolic pathways and energy metabolism in the relationship. The third part is the transmission of genetic information and expression. the main content is to clarify the molecular expression of genetic information transfer. ie replication. transcription and protein biosynthesis and genetic engineering of key processes. The fourth part is the function of biochemistry. including liver biochemistry. water and salt metabolism and hydrogen ion metabolism. Contents: Introduction Chapter I Section I of protein structure and function of the protein molecule composed of physical and chemical properties of protein II Section III Section IV of protein function relationship between protein structure and function classification of Chapter V of protein structure and function of nucleic acids Section II the chemical composition of nucleic acid molecular structure of nucleic acids III Chapter III of physical and chemical properties of nucleic acid enzymes Section II the characteristics of enzymatic reaction of enzyme structure and function of the third quarter impact of vitamin and coenzyme fourth enzymatic speed of response adjustment factor V Section VI of the enzyme activity of the classification and naming enzymes and Medicine Chapter VII of carbohydrate metabolism glucose catabolism Section II Section III glycogen synthesis and breakdown...
